(54) Title: ACCESS PROVIDER AND SERVER FOR OFFERING AN INTERNET PORTAL HAVING A MENU

(57) Abstract: Servers (7), for offering an internet portal comprising a main menu (100) comprising menu-items (110, 120, 130, 140, 150) to a mobile terminal (1), comprise transmitting modules (75) for transmitting portal signals comprising menu-item signals to said terminal and receiving modules (74) for receiving activation signals comprising menu-item codes from said terminal for activating menu-items, and can be made more user-friendly by adding to each menu-items at least two sub-menu-items (111-115, 121, 127, 131, 139, 141, 146, 151, -155) and by providing servers with generating modules (76) for generating sub-menu-item signals, which are personalized when added to a first menu-item and which are non-personalized when added to a second menu-item. With addressing modules (77) for addressing service providers, said mobile phone can be coupled to service providers, and with supplying modules (78) for supplying time-dependent information and adjusting modules (73) for allowing adjustment of user-dependent information, all only after further activation signals have been received, the main menu gives an even better overview resulting in a further increased user-friendliness.

**Declaration under Rule 4.17:**

— *of inventorship (Rule 4.17(iv)) for US only*

*For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*

**Published:**

— *with international search report*  
— *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*
